

# DRIVING SUSTAINABILITY LEADERSHIP

The EAUC is a strong alliance of universities and colleges, sector bodies and commercial organisations, working together both in the UK and internationally. We stand strong individually, but we make a far stronger impact when we work together. Education has a huge role to play but we need to drive next generation **leadership** to address next generation **sustainability**. We need to look wider, internationally, globally, to business and to the next leaders: students.

**So we are challenging ourselves, our Partners and our Members to take stock of the state of the sector with a fresh focus on driving leadership. This is an overview of what we're doing.**

## PUTTING SUSTAINABILITY INTO THE DNA OF YOUR ORGANISATION

### Making the business case

Connecting leadership and governance with sustainability and finding the right language

### Creating new sector alliances

Supporting colleges in partnership with the AoC and with industry and employers through IEMA

### Thinking local but acting global

Building a global alliance of education networks to speak with one powerful voice

### Show me the money

Accessing new carbon reduction investment finance

### Giving the sector a voice

Bringing key sector stakeholders together to address the sustainability policy vacuum

### A job well done

Recognising and championing excellence across the UK and globally

### Powerful partnerships

Building a shared gateway to exchange expertise and resources from over 25 UK and international partner organisations

### Drivers for sustainability

Delivering powerful self-assessment and planning tools

### Leaders for the future

Supporting experienced and pioneering Members move from operational to strategic with leadership and advanced level training

**WE WILL HELP YOU ACHIEVE THIS**

### Challenging Connections

Bringing new thinking, insights and voices to drive a step change on the ground

Keep updated on all of this work at [www.eauc.org.uk](http://www.eauc.org.uk) and join us to be part of the next generation of sustainability leadership
